If youre like, you can also customize site access like whether sites can track you with cookies, show pop-up ads, or access your location... Firefoxs anti-tracking features are enabled by default, not just when you use its Private Browsing Mode... While browsers cant protect you from every trap, some are better at helping you maintain your anonymity and surf the web securely... Digital Trends may earn a commission when you buy through links on our site. You can also just use the Standard option that allows you to have the best of both worlds: Better performance and tracker blocking... Safari can do this by using machine learning to detect advertisers and other trackers and then removing their cross-site tracking data... According to Apple, Safari uses machine learning to prevent the tracking of your data, including your browsing history... Safari also offers several other helpful security features, including sandboxing, warnings for unsafe websites, Private Browsing (which includes a DuckDuckGo default search engine), and the auto-generation of strong passwords that can be auto-filled and stored for all of a users Apple devices... Like Firefox, you can choose from three tracking prevention options to determine your privacy (Basic, Balanced, or Strict)... And, if you head to an unsecured site, SmartScreen will also warn you about that, too.
